

SOORAJ SOMARAJAN

Senior Graphic Designer — Marketing Design | Web, Paid, Social, Email & Motion

Toronto, Ontario | (437) 989-7592 | soorajnandanam44@gmail.com

PROFESSIONAL SUMMARY

Senior marketing designer with 7+ years across brand, web, ad creative, and motion — from concept and creative direction through design, animation, build, and shipped delivery. I design conversion-focused Webflow landing pages, paid ad creative for Meta and Google, organic social for Instagram and Facebook, email campaigns, and motion graphics for product demos and explainer videos.

I build and maintain design systems that keep every channel cohesive, and I design for conversion and aesthetics — treating a landing page with the same standard as a campaign launch. AI image and video tools are part of my daily production workflow, and I have tested enough of them to know which ones are actually worth using. Experience spans B2B technology and SaaS-style solutions, beauty, wellness, ecommerce, and service-based businesses — the exact audiences Yocale serves.

WHAT I BRING

- **Landing pages, ad creative, and website assets** across all marketing channels — designed in Figma, built responsive in Webflow
- **Paid ad creative for Meta and Google**, plus organic social content for Instagram, Facebook, and LinkedIn
- **Video, motion graphics, and animation** for social ads, product demos, and explainer videos — After Effects, Premiere Pro, DaVinci Resolve
- **3D design** — Blender modelling and rendering for product visualization and campaign assets
- **AI-driven creative production**: hands-on daily use of AI image, video, and voice tools (Google Veo, Kling, Gemini, Nano Banana Pro), with a practical framework for evaluating new tools (Runway, Pika, Luma-class) on quality, control, consistency, and speed
- **Design system development and maintenance** — reusable components for typography, color, layout, and motion that keep campaigns cohesive at speed
- **Email marketing design** — campaign graphics and reusable templates, quick to adopt platform-specific systems such as HubSpot
- **Conversion-focused thinking** — creative testing and optimization informed by click-through rate, cost-per-message, and conversion flow

PROFESSIONAL EXPERIENCE

AHEARN & SOPER INC. — Etobicoke, Ontario

Graphic Designer (Marketing Design Lead) | February 2024 – Present

Own marketing design end-to-end for a Canadian enterprise technology integrator (barcode, RFID, printing, automation, and warehouse solutions).

- Design and build responsive, conversion-focused landing pages and campaign experiences in Webflow, with strong visual hierarchy and lead-generation intent.

- Create paid ad creative and organic social content for LinkedIn, Instagram, and Facebook — static, carousel, animated, and video formats.
- Produce motion graphics, product demo videos, explainer content, and campaign video using After Effects, Premiere Pro, and DaVinci Resolve — from storyboard and animation direction to final edit.
- Run integrated campaigns across web, paid, social, email, video, and print for enterprise partners including Zebra Technologies, Honeywell, Epson, Canon, and Entrust.
- Maintain visual consistency across typography, layout, color, imagery, iconography, and motion — effectively owning the design system across all marketing output.
- Use AI image, video, voice, and writing tools in production to accelerate concepting, generate campaign variations, and compress delivery timelines without losing brand consistency.
- Design email marketing graphics and campaign templates supporting lead-nurture and product-launch sends.
- Photograph and film products for websites, campaigns, demos, and social content.
- Translate complex technical features into clear, benefit-led, conversion-oriented messaging for business owners and operations teams.
- Work directly with leadership, marketing, sales, and external partners; manage multiple simultaneous campaigns and deliver on brief, on schedule.

INDEPENDENT BRAND & DIGITAL DESIGNER — Toronto, Ontario

Freelance / Contract Designer | [Year] – Present

Brand, web, ecommerce, advertising, and motion design for small businesses and consumer brands — the service-based entrepreneurs Yocale is built for.

- Develop complete visual identities and design systems: typography, color, components, product sections, social templates, and campaign layouts built for reuse.
- Design and build responsive Webflow websites and landing pages for service businesses, ecommerce brands, and product companies.
- Produce social ad creative, product launch content, short-form video, and animation.
- Work directly with business owners on creative direction, feedback, and revisions — fast turnarounds without ego.

ANIMATION FACULTY & DESIGNER — India

Graphic Designer, Motion Designer & Instructor

- Produced branding, promotional graphics, motion content, and edited video for educational and commercial applications.
- Taught typography, layout, composition, animation principles, and production workflows — deep command of the visual fundamentals from teaching them.
- Managed projects from concept through design, revision, and delivery.

ENTERPRISE TECHNOLOGY CAMPAIGNS

Campaign Designer & Motion Graphics Producer | Ahearn & Soper partner brands

Concept, design, and produce full integrated campaigns for global enterprise technology brands — landing pages, paid and organic social, motion graphics, product demos, and explainer videos, from creative direction through final delivery.

- **Zebra Technologies** — Campaign landing pages and launch assets for printers, scanners, and enterprise hardware. Built a dedicated dark-mode campaign design system (high-contrast industrial visual language with scanning-inspired UI motifs) applied consistently across Webflow landing pages, banners, paid ads, and social.
- **Honeywell** — Product and solution campaigns for data collection and warehouse automation: landing pages, social ad creative, motion graphics, and explainer videos translating technical specs into operations-level benefits.
- **Epson ColorWorks** — Colour label printing campaigns: product demo videos, motion graphics, landing pages, and social assets showcasing print quality and workflow advantages.
- **Canon** — Industrial printing product campaigns: web assets, banners, and product-focused creative.
- **Entrust** — Card-printing system campaigns: landing pages, sales presentation materials, and product imagery.
- **Warehouse management & automation solutions** — Explainer videos and campaign assets simplifying complex logistics workflows for business decision-makers.
- Across all campaigns: creative concepts, storyboards, animation direction, product photography and videography, video editing, and conversion-oriented landing-page design in Webflow.

TOOLS & SKILLS

Design & Prototyping: Figma, Photoshop, Illustrator, InDesign

Web: Webflow (design + build), responsive/mobile-first design, landing-page optimization, Shopify integration, HTML, CSS, WordPress

Motion & Video: After Effects, Premiere Pro, DaVinci Resolve — motion graphics, animation, compositing, color correction, storyboarding, product demos, social video

3D: Blender — 3D modelling, product visualization, texturing, lighting, and rendering for product and campaign visuals

AI Creative Tools: Google Veo, Kling, Gemini, Nano Banana Pro — AI image and video generation, prompt systems, video previsualization, voice and content workflows; structured evaluation of emerging tools (Runway, Pika, Luma-class)

Marketing: Meta and Google ad formats, LinkedIn campaigns, Instagram/Facebook organic content, email campaign design, creative testing, conversion-focused design

Production: Product photography and videography, studio lighting, retouching, Sony cinema-camera workflows, DJI aerial content

DESIGN APPROACH

- Deliver conversion and aesthetics together — one is not an excuse to skip the other.
- Build modular systems so every channel stays cohesive as output scales.
- Use motion intentionally: hierarchy, storytelling, and product understanding first.
- Judge AI tools on creative quality, control, consistency, and real production value — not hype.
- Strong opinions about kerning and motion easing curves, held with no ego about feedback.

EDUCATION

Seneca College — Toronto, Ontario — Advanced Diploma in Graphic Design (3-year program)

LCC Computer Education — Kochi, India — Diploma in Animation and Film Editing (2-year program)
